

QUICK-START · OUTSIDE & COMMUNITY PROVIDERS

Bring it into your practice

For providers who work with a school or family but aren't employed by one — private

practice, outside OT/PT/SLP, and community clinics. Consent-first, on your own device.

1 Open the site

Go to architectureofgrace.org on your laptop, tablet, or phone. It works offline once loaded.

2 Get consent first

Because you're outside the school, start with the family's (or student's) written consent to use a private workspace. Nothing is shared with anyone unless they choose to.

3 Open the Specialist workspace

Dashboard → View as: Specialist. Add each client once; track sessions and scored screeners (PHQ-9 / GAD-7) with safety flags — all on this device.

4 Bring two settings together

If the family also uses Family Mode at home, the Both view overlays home + your sessions for a fuller picture in a parent meeting.

5 Hand off cleanly

Export a CSV or print a cover to share progress with the family or, with their permission, the school team. You decide what leaves the device. Then tell us how the consent-first, outside-provider flow fit your practice. Private & on-device by default — no account, no login, no tracking. Nothing is sent anywhere unless you choose to share it.
