

QUICK-START

For Parents & Families

Welcome. Here is the five-minute way to reflect together at home — and to watch your child grow over time, in the same language their school uses.

1 Open the site

Go to architectureofgrace.org on your phone, tablet, or computer.

2 Set up Family Mode

Begin Self-Reflection → Family Mode, and add each family member once.

3 Reflect together

Let your child answer honestly — there are no wrong answers.

4 Talk it through

Read the results together and use the conversation starters (you can print them).

5 See growth over time

Family Mode tracks each child across self-reflections, so you can see growth — the same Trajectory a school sees, for your family. A gentle path from rupture to repair, at home.

6 Keep it yours

Nothing is sent anywhere. Use Personalize (sliders icon) to set the Word of Grace to Child or Teen.

TRY THESE — new and worth it

- **See home and school together**

Ask your school to compare in Trajectory, then Both — your child's home and school growth on one chart, in the same language.

- **The “What helps me” picker**

On the results screen your child saves what calms them; it returns the next time they reflect.

Want more? The [Grace at Home](#) and [Grace for Parents](#) pages walk you through it, with printable conversation starters.
